

Seasonal Water Service Update for the Waskesiu Townsite – Friday, May 7, 2021

Asset crews have just reported that water services have now been restored to Prospect Point, the Parcel X Cabin area and Subdivisions 1 & 2. Crews hope to restore Subdivision 3 on Monday.

Individual cabin lines may still be frozen but the water mains in these areas are open.

The little beach house remains frozen.

Parks Canada considers restoring the water service to the Waskesiu Community each spring a priority and we are actively working to make that happen. We are doing our best to have water service in all areas as available as soon as possible.

Thank you,

N. Scott Nesbitt
